1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, drawn to plastic material with a conic cross section.

Group II, claim(s) 3-6, drawn to a matrix for forming a material with a conic cross section.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature of the claims is a surface with holes separated by segments with a conic section. This is not a special technical feature because US 4,780,352 A; DE 29 48 376

Art Unit: 1772

A; and EP 0 138 601 A; all show this technical feature to be old and known in the art.

3. A telephone call was made to Mr. J. Finkelstein on 10 June 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
